PYROIL™ CHLORINATED BRAKE PARTS CLEANER

DESCRIPTION:

Pyroil Chlorinated Brake Parts Cleaner is safe to use on brake parts to remove brake fluid and built-up dust effectively and is designed to powerfully blast away deposits. Brake cleaners which “evaporate instantly” or claim to be “fast drying” can leave an oily residue. **Pyroil Chlorinated Brake Parts Cleaner** controls the rate of evaporation so dissolved oil and contaminants are carried away, rather than re-deposited on the brake parts.

Pyroil Chlorinated Brake Parts Cleaner is non-flammable and non-conductive, which makes it a natural for cleaning electric motors. Brushes in a running electric motor cause sparks which could ignite a flammable cleaner, its vapors, or residue. A conductive cleaner could short an electric motor, causing a catastrophic failure. **Pyroil Chlorinated Brake Parts Cleaner** is neither conductive nor flammable.

Pyroil Chlorinated Brake Parts Cleaner may be used on brake parts, pads, linings, drums, rotors, calipers, springs, backing plates, etc. It is an all-round degreaser and may be used on clutch discs and pressure plates, electric motors, switches, and contacts. Be sure to use the product in well ventilated, open areas. To use, simply hold can upright 4-6 inches from part to be cleaned and spray. An extension tube is provided for pinpoint accuracy and for hard to reach areas

| Part Number | Description | Unit UPC |
|-------------|--|-----------------|
| PYBPC20 | Pyroil Chlorinated Brake Parts Cleaner 12/18 oz. aerosol | 0 28882 10009 0 |

BENEFITS:

- Non-Flammable And Non-Conductive
- Removes Brake Fluid, Oil, Gum, Varnish, Sludge And Brake Dust Instantly
- Flushes Oil, Dirt, And Carbon Deposits From Electric Motors
- Contains No Petroleum Solvents
- Use Directly On Pads, Linings, And Other Friction Parts
- Dries Leaving No Residue
